

# SANGFOR IAM

## M6000-AC-I

As the leading vendor of Network Management, Sangfor IAM has been already listed in the SWG Gartner Magic Quadrant for 7 years in a row.

It has professional internet bandwidth management, application control, URL filter, traffic control, information control, illegal hotspot/proxy control, behaviour analysis, wireless network management and many other features, which can truly help you achieve a Unified Internet Behaviour Management of all clients in the entire network.

IAM-M6000 is the ideal network management solution for Medium Corporate Enterprises. IAM M6000 is also ideal for Medium - Large Branch Deployment.

Performance & Capacity	IAM M6000-AC-I
Dimension	2U
Firewall Throughput	3Gbps
Application Layer Throughput	2Gbps
Recommended Concurrent Users	10,000
Concurrent Connections (TCP)	1,000,000
New Connections (TCP)	20,000
Redundancy Power Supply	Support

Hardware Specifications	IAM M6000-AC-I
RAM	4 GB
Storage HD Capacity	1 TB
Power [Watt] Max	350 W
Operating Temperature	0°C~40°C
Humidity	5%~95% non-condensing
System Weight	15.9 Kg
System Dimensions	600x440x89 mm

Compliance	IAM M6000-AC-I
Certifications	CE, FCC

Network Interfaces	IAM M6000-AC-I
Bypass (Copper)	2 pairs
10/100/1000 Base-T	4
SFP	4
10G Fiber SFP	N/A
Optional Interface & 10G Fiber SFP*	N/A
Serial Port	1 x RJ45
USB Port	2

### Deployment Modes

#### Gateway Mode

It uses layer-3 switching mode so that all traffic is handled by Sangfor IAM to implement functions such as authentication, proxy server, traffic management, behaviors control, reporting and log audit of internal users. Sangfor IAM can help organizations improve the work productivity, make the internet bandwidth more efficient and reduce the overall TCO.

#### Bridge Mode

The bridge mode is useful for organizations that do not wish to modify the current network structure, router configuration or IP configuration. Sangfor IAM will help organizations improve the work productivity, make the internet bandwidth more efficient and let the traffic & user behavior become visible and controllable.

#### Bypass Mode

In this mode, Sangfor IAM connects to the mirrored port of the switch. In bypass mode, the existing network structure is not affected. This decreases the occurrence rate of single-point failure. Sangfor IAM will help to monitor and audit data traffic & user behavior on the LAN, as well as manage & control TCP behavior of users.

#### Single-Arm Mode

In Single-arm mode, Sangfor IAM connects to a hub or switch to monitor and control the entire local network. The customer's network does not need to be reconstructed. Sangfor IAM implements functions including but not limited to: authentication, proxy server, traffic management, behavior control, reporting and log audit of internal users.

## Key Features

### ① Unified Management of all Clients in the Entire Network

Sangfor IAM can effectively control both Wired and Wireless networks, achieving Unified Management of all clients in the entire network. Rich and flexible authentication methods, such as username/password, IP/MAC binding, etc., as well as value-added marketing authentication methods (QR code, SMS, WeChat, Facebook, Alipay, etc.) are available in Sangfor IAM. It can also control permissions based on user, application, location and client types.

### ② Intelligent Control with Visibility of User Behavior & Traffic

Sangfor IAM is able to manage and control network applications & web browsing more conveniently and accurately. It has one of the largest application signature database and URL database, which are updated every 2 weeks. Its bulk management mode for large enterprises greatly improves the productivity and efficiency.

Thanks to three unique major traffic management technologies (Dynamic Traffic Control, Intelligent Flow Control, Quota Control) of Sangfor IAM, the bandwidth utilization can be improved by more than 30%.

### ③ Simple & Intuitive Reporting for Simpler Network Management

SANGFOR IAM is built-in with an Advanced Report Center, which supports various customized reports based on traffic statistics, queries, ranking, times and behavior of user & user groups, helping enterprises analyze the root causes of all network issues. IT managers are provided with all the detailed information they need to know about their network, including Internet access activities, bandwidth consumption and viewed contents.

Reports are self-generated and automatically & regularly sent to an appointed e-mail address to effectively assist in the network design, secure it and optimize the usage of the bandwidth.

## Hardware Description

1. LED Indicators
2. Line Interface
3. USB Ports
4. Management Console
5. Fan Trays
6. Switch
7. Power Outlet

### 01 User Authentication and Management

Mapping and identifying users | IP/MAC binding, hostname, USB Key, SMS, QR-Code, Portal, WeChat, Facebook, etc. | User accounts importing and synchronizing from LDAP, CAM3, etc. | SSO integration: AD/POP3/Proxy/Radius, 3rd party authentication device and DB Server.

### 02 Access Control

Application control | URL filtering | Search Engine Control, Enhanced Email/IM control | File filtering | SSL traffic control | Illegal Wi-Fi & proxy tools control.

### 03 Bandwidth Management

BM according to specific object/policy | International & Domestic BM | Bandwidth Guarantee & Limitation | Multi-level SON Channel | Dynamic BM | Virtual line | Multiplexing and intelligent routing.

### 04 Report Center

Report based on application traffic, user behavior, etc. | Graphical reports by counts, ranking, comparison, trends analysis with statistics, pie, bar, line chart, etc. | Real time report | Content log for IM chat records, emails, forum posts, etc. | Customized CIO report | Built-in internal and optional external report center | Export to CSV or PDF format.

### 05 Management & Deployment

Centralized management support | Proxy functions: HTTP/HTTPS Sockets 4/5, ICAP | HA support (A/A, A/P), Hardware bypass | Deployment mode: Route, Bridge, Double Bridge, Bypass, Single-arm | Built-in Firewall | IPsec VPN.

## IAM M6000-AC-I Ordering Guide

DESCRIPTION	For more information on Sangfor' full range of support & services, please contact your local representative.
<b>Sangfor IAM M6000-AC-I Hardware and Basic Software (Mandatory)</b>	
M6000-AC-I, Sangfor Internet Access Management Standard Packs, including Bandwidth Management, User Authentication, URL Filtering, Traffic Control, User Behaviour Audit, Content Audit, Proxy Server, Anti-proxy, Endpoints Management, Report Center, Multi-links (Link Load Balance), Sangfor VPN	
<b>Sangfor IAM URL Database (Optional)</b>	
M6000-AC-I, Sangfor IAM URL Database 1-Year License. Can be extended as needed.	
<b>Sangfor IAM Anti-Virus Module (Optional)</b>	
M6000-AC-I, Software, Enable Anti-Virus Module with 1-Year License. Can be extended as needed.	
<b>Sangfor IAM Software Module, Permanent License</b>	
IPSec VPN Remote Client, IPSec VPN Remote Client, 1 User Support SMS authentication (requires SMS Gateway or Modem)	
<b>Sangfor IAM Care Services</b>	
M6000-AC-I, IAM Software and Technical Support Service, IAM RTF, SDS, NBD and 24*7*4 Premium Hardware Service : 1 year, 3 years or 5 years options.	
<b>Sangfor IAM Accessories</b>	
1) Authentication KEY, Access authentication KEY for user   1 key	3) Free Audit KEY   1 key
2) Data Center Authorization key, Authorization for data center access   1 key	4) GSM/CDMA SMS Modem
