</table>

### Deployment Modes

**Gateway Mode**

It uses layer-3 switching mode so that all traffic is handled by Sangfor IAM to implement functions such as authentication, proxy server, traffic management, behaviors control, reporting and log audit of internal users. Sangfor IAM can help organizations improve the work productivity, make the internet bandwidth more efficient and reduce the overall TCO.

**Bridge Mode**

The bridge mode is useful for organizations that do not wish to modify the current network structure, router configuration or IP configuration. Sangfor IAM will help organizations improve the work productivity, make the internet bandwidth more efficient and let the traffic & user behavior become visible and controllable.

**Bypass Mode**

In this mode, Sangfor IAM connects to the mirrored port of the switch. In bypass mode, the existing network structure is not affected. This decreases the occurrence rate of single-point failure. Sangfor IAM will help to monitor and audit data traffic & user behavior on the LAN, as well as manage & control TCP behavior of users.

**Single-Arm Mode**

In single-arm mode, Sangfor IAM connects to a hub or switch to monitor and control the entire local network. The customer’s network does not need to be reconstructed. Sangfor IAM implements functions including but not limited to: authentication, proxy server, traffic management, behavior control, reporting and log audit of internal users.

**Authentication Mode**

In the authentication mode, Sangfor IAM works as an authentication server, offering unified authentication management and the multiple authentication method such as SMS, WeChat and Facebook that can be achieved when using common WLAN service.

[SANGFOR TECHNOLOGIES INC.](www.sangfor.com)

sales@sangfor.com

Your One-Stop Solution for Network Security & Cloud Computing
Unified Management of all Clients in the Entire Network

Sangfor IAM can effectively control both Wired and Wireless networks, achieving Unified Management of all clients in the entire network. Rich and flexible authentication methods, such as username/password, IP/MAC binding, etc., as well as value-added marketing authentication methods (QR code, SMS, WeChat, Facebook, Alipay, etc.) are available in Sangfor IAM. It can also control permissions based on user, application, location and client types.

Intelligent Control with Visibility of User Behavior & Traffic

Sangfor IAM is able to manage and control network applications & web browsing more conveniently and accurately. It has one of the largest application signature database and URL database, which are updated every 2 weeks. Its bulk management mode for large enterprises greatly improves the productivity and efficiency.

Simple & Intuitive Reporting for Simpler Network Management

SANGFOR IAM is built-in with an Advanced Report Center, which supports various customized reports based on traffic statistics, queries, ranking, times and behavior of user & user groups, helping enterprises analyze the root causes of all network issues. IT managers are provided with all the detailed information they need to know about their network, including Internet access activities, bandwidth consumption and viewed contents.

Business Intelligence

The Sangfor Business Intelligence platform is based on Hadoop and adapted to Mapreduce data process technology & NoSQL database to perform TB data query’s in seconds and makes data processing more efficient and intelligent. Traffic identification distinguishes between user and machine traffic while the Graph Computing and Machine Learning performs modeling analysis of all traffic. Scenario based applications brings you the best ever operation experience.

Key Features

1. Unified Management of all Clients in the Entire Network
2. Intelligent Control with Visibility of User Behavior & Traffic
3. Simple & Intuitive Reporting for Simpler Network Management
4. Business Intelligence

Software Features

01 User Authentication and Management
- Mapping and identifying users
- IP/MAC binding, hostname, USB Key, SMS, QR-Code, Portal, WeChat, Facebook, etc.
- User accounts importing and synchronizing from LDAP, CAM3, etc.

02 Access Control
- Application control
- URL filtering
- Search Engine Control
- Enhanced Email/IM control
- File filtering
- SSL traffic control
- Illegal Wi-Fi & proxy tools control.

03 Bandwidth Management
- BM according to specific object/policy
- International & Domestic BM
- Bandwidth Guarantee & Limitation
- Multi-level SON Channel
- Dynamic BM
- Virtual line
- Multiplexing and intelligent routing.

04 Report Center
- Report based on application traffic, user behavior, etc.
- Graphical reports by counts, ranking, comparison, trends analysis with statistics, pie, bar, line chart, etc.
- Real time report
- Content log for IM chat records, emails, forum posts, etc.
- Customized CIO report
- Built-in internal and optional external report center
- Export to CSV or PDF format.

05 Management & Deployment
- Centralized management support
- Proxy functions
- HTTP/HTTPS Sockets 4/5, ICAP
- HA support (A/A, A/P)
- Hardware bypass
- Deployment mode: Route, Bridge, Double Bridge, Bypass, Single-arm
- Built-in Firewall
- IPsec VPN

Hardware Description

1. Management Console
2. USB ports
3. Line Interface
4. LED Indicators
5. Fan Trays
6. Power Outlet

IAM M5000-AC-I-S Ordering Guide

DESCRIPTION

For more information on Sangfor’s full range of support & services, please contact your local representative.

Sangfor IAM M5000-AC-I-S Hardware and Basic Software (Mandatory)

Sangfor IAM URL Database (Optional)

M5000-AC-I-S, Sangfor IAM URL Database 1-Year License. Can be extended as needed.

Sangfor IAM Anti-Virus Module (Optional)

M5000-AC-I-S, Software, Enable Anti-Virus Module with 1-Year License. Can be extended as needed.

Sangfor IAM Software Module, Permanent License

IPSec VPN Remote Client, IPSec VPN Remote Client, 1 User Support SMS authentication (requires SMS Gateway or Modem)

Sangfor IAM Care Services

M5000-AC-I-S, IAM Software and Technical Support Service, IAM RTF, SDS, NBD and 24*7*4 Premium Hardware Service: 1 year, 2 years or 3 years options.

Sangfor IAM Accessories

1) Authentication KEY, Access authentication KEY for user | 1 key
2) Data Center Authorization key, Authorization for data center access | 1 key
3) Free Audit KEY | 1 key
4) GSM/CDMA SMS Modem

Business Intelligence

- Sangfor Business Intelligence provides scenario-based analytics & applications including Electricity Waste Analytics, Event Analytics, Leased Line Analytics (Report Center, Bandwidth Analytics, Internet Access Analytics are built-in)
- 1000 endpoints license for BI
- Software and Technical Support, BI and application upgrade, Sangfor IAM-BI, 1 year, 3 years, 5 years.
