SANGFOR

Give Branch Business Digital Transformation a Boost

Make IT Simpler,
More Secure and Valuable!

Sangfor SD-WAN Introduction

Digital transformation has forced many who rely on MPLS network architecture to seek out easier ways to support cloud apps and explosive business expansion. Some are turning to cost-effective internet broadband and LTE, yet are experiencing serious issues.

Before choosing their internet link, enterprises must consider three major issues: link interruption, efficiency, and incident response and compliance. First, with no SLA in the link to guarantee availability, there is a risk of link interruption and slow down. Secondly, user and staff efficiency decrease when users have access to time-wasting sites with streaming video or online gaming sites. Finally, unrestricted access to the internet may open your company up to potential cyber-attacks and non-compliance fines.

Sangfor SD-WAN is an integrated solution, designed to enhance business reliability and provide layered protection of assets, from user to server. SD-WAN is proven great for even enterprises with limited budgets and provides extremely simple to O&M with strong security capabilities.

Sangfor Secure SD-WAN Architecture

Center	Neural-X	CM/PX	ES Manager	Apps Server		
Access Device		NGAF		NGAF		SSL VPN
Branch Gateway	SIER	NGAF		NGAF		
Branch User	Endpoint Secure	Endpoint Secure		Endpoint Secure		Remote

Gateway

- **Next Generation Application Firewall (NGFW):** Total Security for WFH and Office Environments

- **Sangfor Intelligent Edge Router (SIER):**

  - Cost Effective Protection & Security

  - Design for small office with cost-effective price and basic security functions

  - Provides embedded LTE&WIFI model for choose

- **Sangfor Central Manager (CM):** Unified Policy Operation & Status Visualization

Endpoint

- **Endpoint Secure (ES):** Immediate Defense Against Malware & APT threats at endpoint

- **Endpoint Secure Manager:** Policy & Liscence Management Solution for Endpoint Secure

Cloud

- **Neural-X:**

  - AI-Enabled Threat Intelligence & Analytics Cloud Platform

  - Interconnected with 20,000+ devices deployed at customer sites and third-party organizations, with open-source resources.

- **Platform-X:** Easily Manage IT Assets, NGAF and Endpoint Secure in Cloud
Components Suggestion

Large-Scale Small Footprint Scenario
- **Data Center:** NGAF
- **Large and Medium Office:** NGAF
- **Small Office:** SIER
- **Endpoint Option:** Endpoint Security + ES Manager
- **Management Option:** Central Manager
- **Typical Case:** Retail, Logistics, Public Utilities, Gas Station, Multi-level Government, etc.

Strong Security Requirements Scenario

- **Data Center:** NGAF
- **Branch Office:** NGAF
- **Endpoint Option:** Endpoint Security + ES Manager
- **Management Option:** Platform-X or Central Manager
- **Typical Case:** Government, Financial, Education, Manufactory, etc.

Highlights & Benefits of Sangfor Secure SD-WAN

1. Guarantees Business Availability

Real-time tunnel quality detection makes it possible for traffic to fail-over in seconds, without user perception. SD-WAN dynamically selects the best quality tunnel for critical apps.

Automatic Fail-Over

Dynamic Path Selection
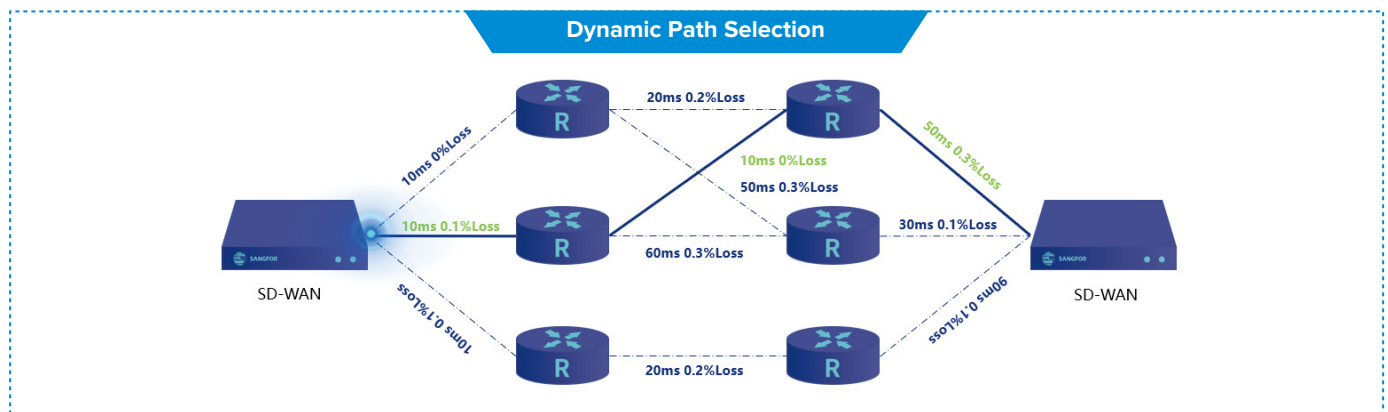

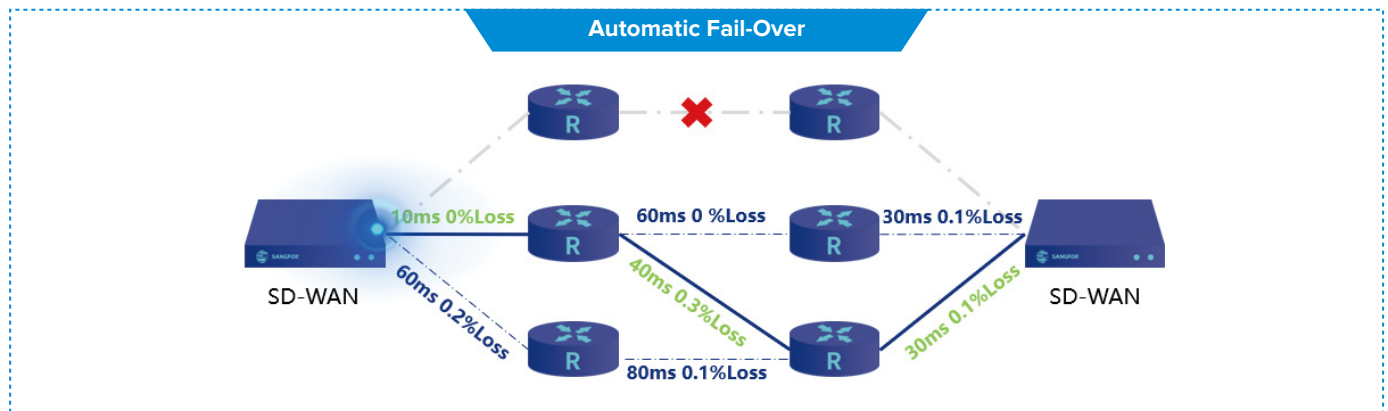

2. Improve Efficiency

Block or limit non-productive activities and sites, and ensure bandwidth for business applications based on local and international cloud URL and application database.

3. Simplify Operation & Management

Deploy SD-WAN with one email and one click in branch offices to provide centralized management and a unified policy, simplifying daily O&M.

Email Deployment

	Step 1	Step 2	Step 3	Step 4
	Connect Cable (WAN/LAN)	Connect PC to Device	Click Email Link	Connect Device to Internet and BBC

8:00 AM   8:10 AM   8:11 AM   8:15 AM

Centralized Management

Branch Status Visualization

VPN Status Visualization

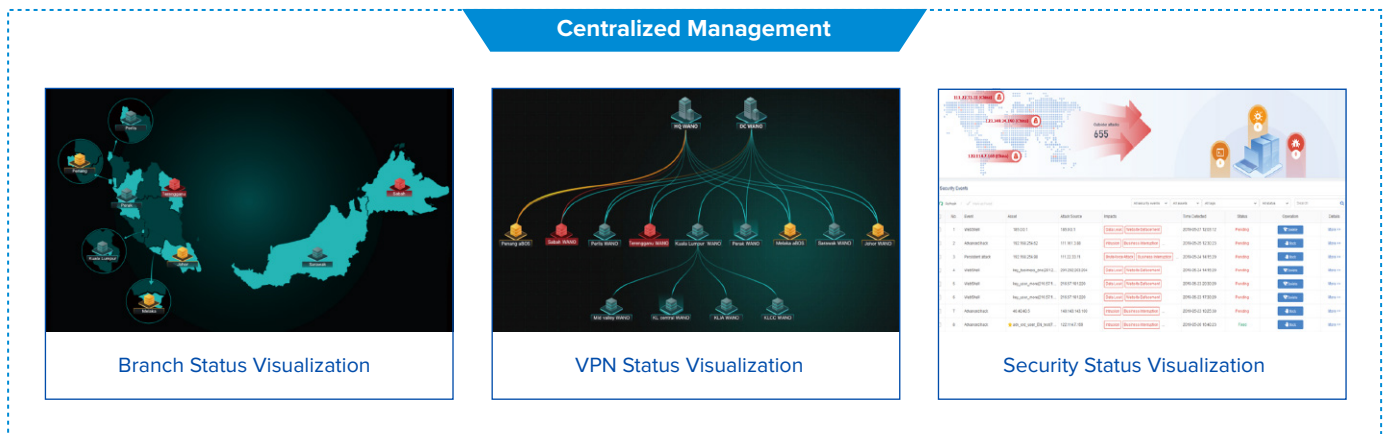

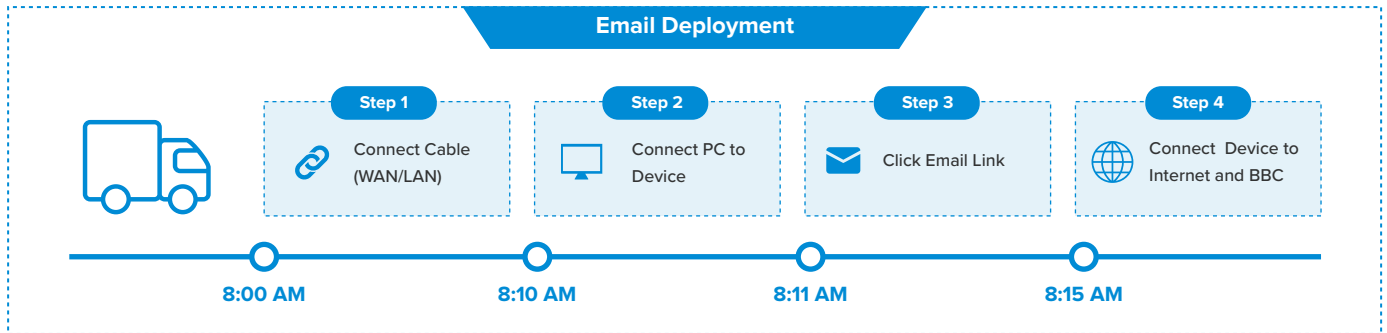

Security Status Visualization

4. Comprehensive Security

Layered protection for endpoints, network, and server, blocking malware and suspicious traffic immediately from the endpoints and gateways.

Risks Summary		Sangfor Solution
• Phishing email and URL • USB device with virus	User	✓ Stop malicious URL at Gateway ✓ Stop viruss with Endpoint Secure
• Lateral movement (Branch-HQ,Branch-Branch) • C&C Breach	Network	✓ Micro-segmentation and anti-brute force functions stop lateral movement ✓ Effectively block C&C ✓ Track root cause of C&C
• Zero-day exploits from branches • Ransomware attack	Server	✓ Fast updates for protection ✓ Closed-loop ransomware protection ✓ Stop malware from scanning branch PCs with Stateful Firewall
